	Species	BNI	Seould	N Tower	Hanseo King-Air	Technique
Precursors Oxidants	NO, NO ₂ , NO _x	◎	◎	◎		Chemiluminescence
	OH radical		◎			CIMS
	NO ₃ , N ₂ O ₅		●			CRDS
	Cl and ClNO ₂					CIMS
	VOCs speciation	◎	◎	◎		On-line GC-FID, TD-MS
Oxydized products	HR VOCs		◎	◎		PTR-MS
	HCHO and aldehyde	◎	◎			DNPH/HPLC
	Oxidized hydrocarbons					CEAS
	PAN		◎			CIMS
	H ₂ O ₂ , Peroxides	◎	●			HPLC, TILDAS
Products Pollutants	Organic Aerosol speciation	◎	◎			High-vol filter & GC-MS
	O ₃	◎	◎	◎		UV absorption, CRDS
	CO, SO ₂	◎	◎	◎	◎	NDIR, Fluorescence
	HNO ₃ , NH ₃	◎	●			AIM
	EC/OC	◎	◎			Sunset
	High resolution aerosol speciation	◎	◎		◎	AMS
	Water soluble organic aerosol		●			PILS-TOC
	Aerosol profil	◎	●			Lidar, Sun photometer
	Aerosol number and size	◎	◎		◎	APS, SMPS, UHSAS
	Aerosol scattering & Absorption	◎	◎			Nephelometer
	Aerosol trace metals	◎	◎			Realtime XRF
	PM _{2.5} mass & chem. compositions	◎	◎			Filter Pack
	refractory Black Carbon	◎	◎			SP2
	Black carbon	◎	◎			AE31

Aircraft observation

Hanseo King-Air

- Gas & aerosol physical and chemical properties

기상장비 배치도

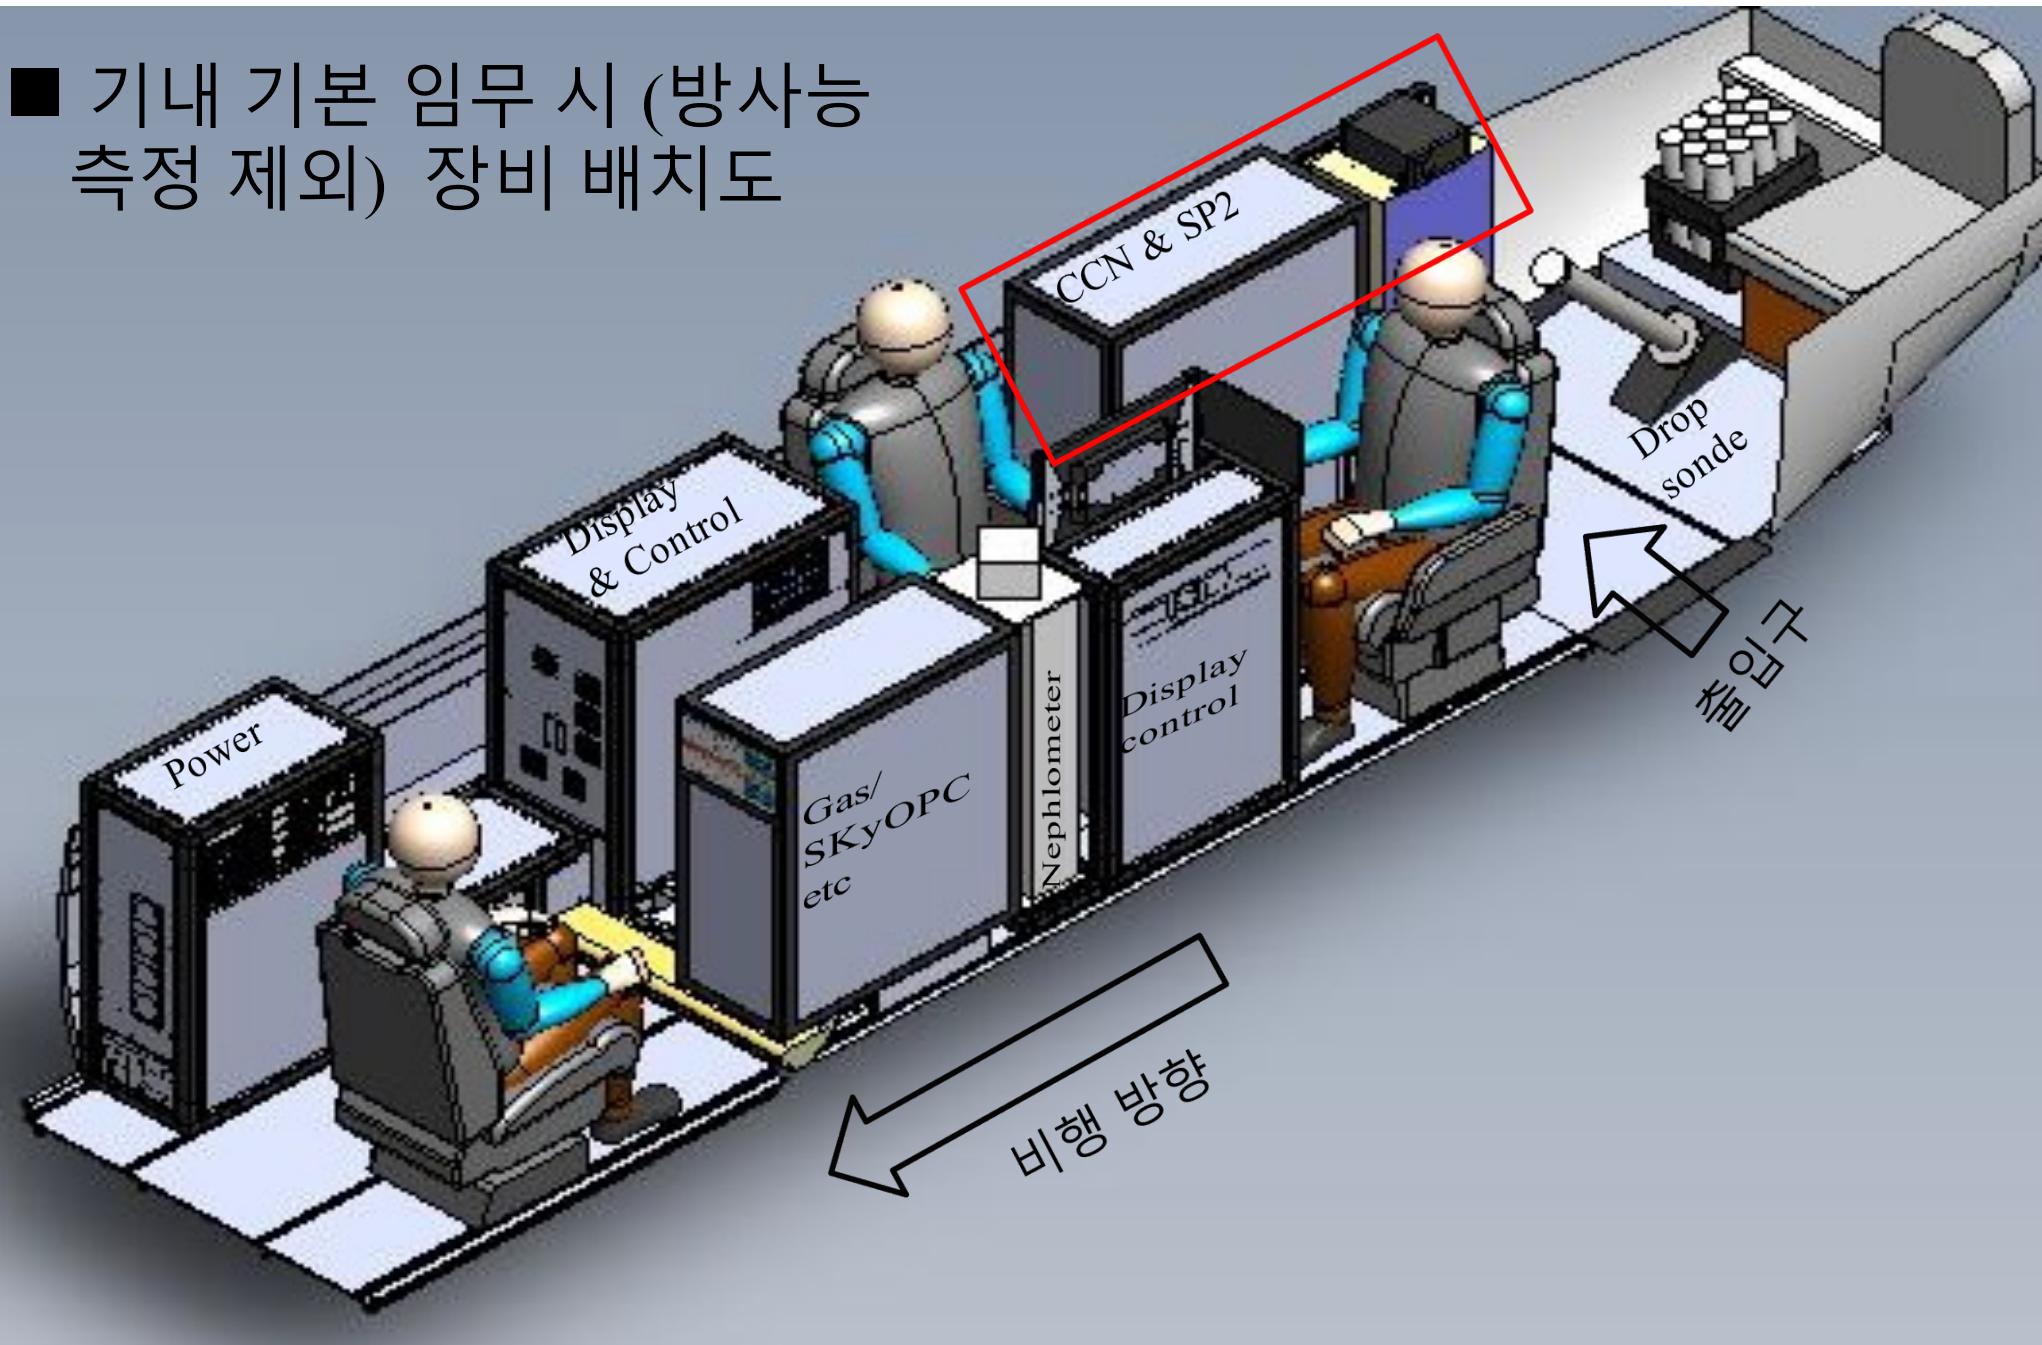

■ 기체 외부

- ✓ 항공기 외부에 기상장비 장착에 따른 항공기 항력 증가로 항공기 기본성능 저하 예상
- ✓ 최종 납품 비행 메뉴얼은 수정 개정판 필요(제안서 제시 제공시간 감소 예상)

기상장비 배치도

■ 기내 기본 임무 시 (방사능 측정 제외) 장비 배치도

Research Vessel (R/V)

Kisang I (KMA)
~500 t

Onnuri (KIOST)

~1400 t
25 researchers

One more possibility
????
Araon (KOPRI)
~7000 t

해양기상관측선 기상1호

주요제원

총톤수	498톤
총길이	64.32M
넓이	9.40M
깊이	4.30M
속력	16.5노트, 최대 18.0노트
주기관	2.332PS X 2대
추진기	FPP X 2축
선수추진기	CPP1축
발전기	주발전기 X 2, 정박발전기 X 1
항해거리	4,000 MILE 이상
연속항해	25일 이상
항해구역	근해(국제포함)
승선인원	32명
선급	KST
취항식	2011년 5월 30일
건조조선소	(주)고려조선소

기상1호를 활용한 황사·연무 관측 예비실험

• 측정장비(국립기상과학원)

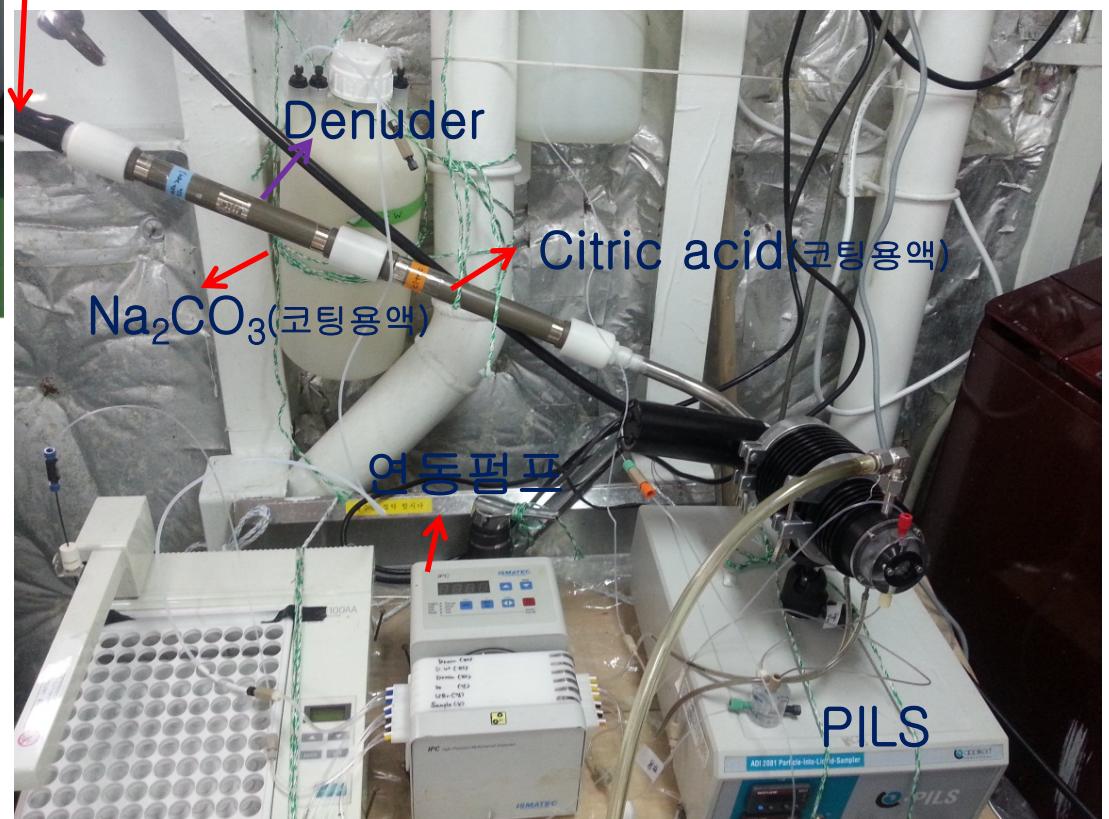

광산란입자계수기(OPC)

Inlet

PILS

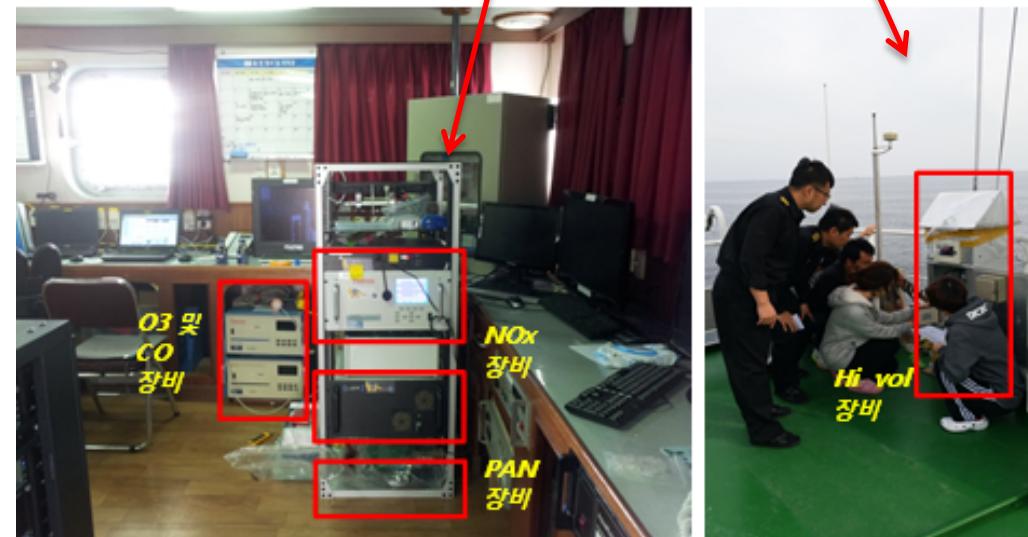

→ 에어로졸필터오염
관측중단
(11.17.~22.)

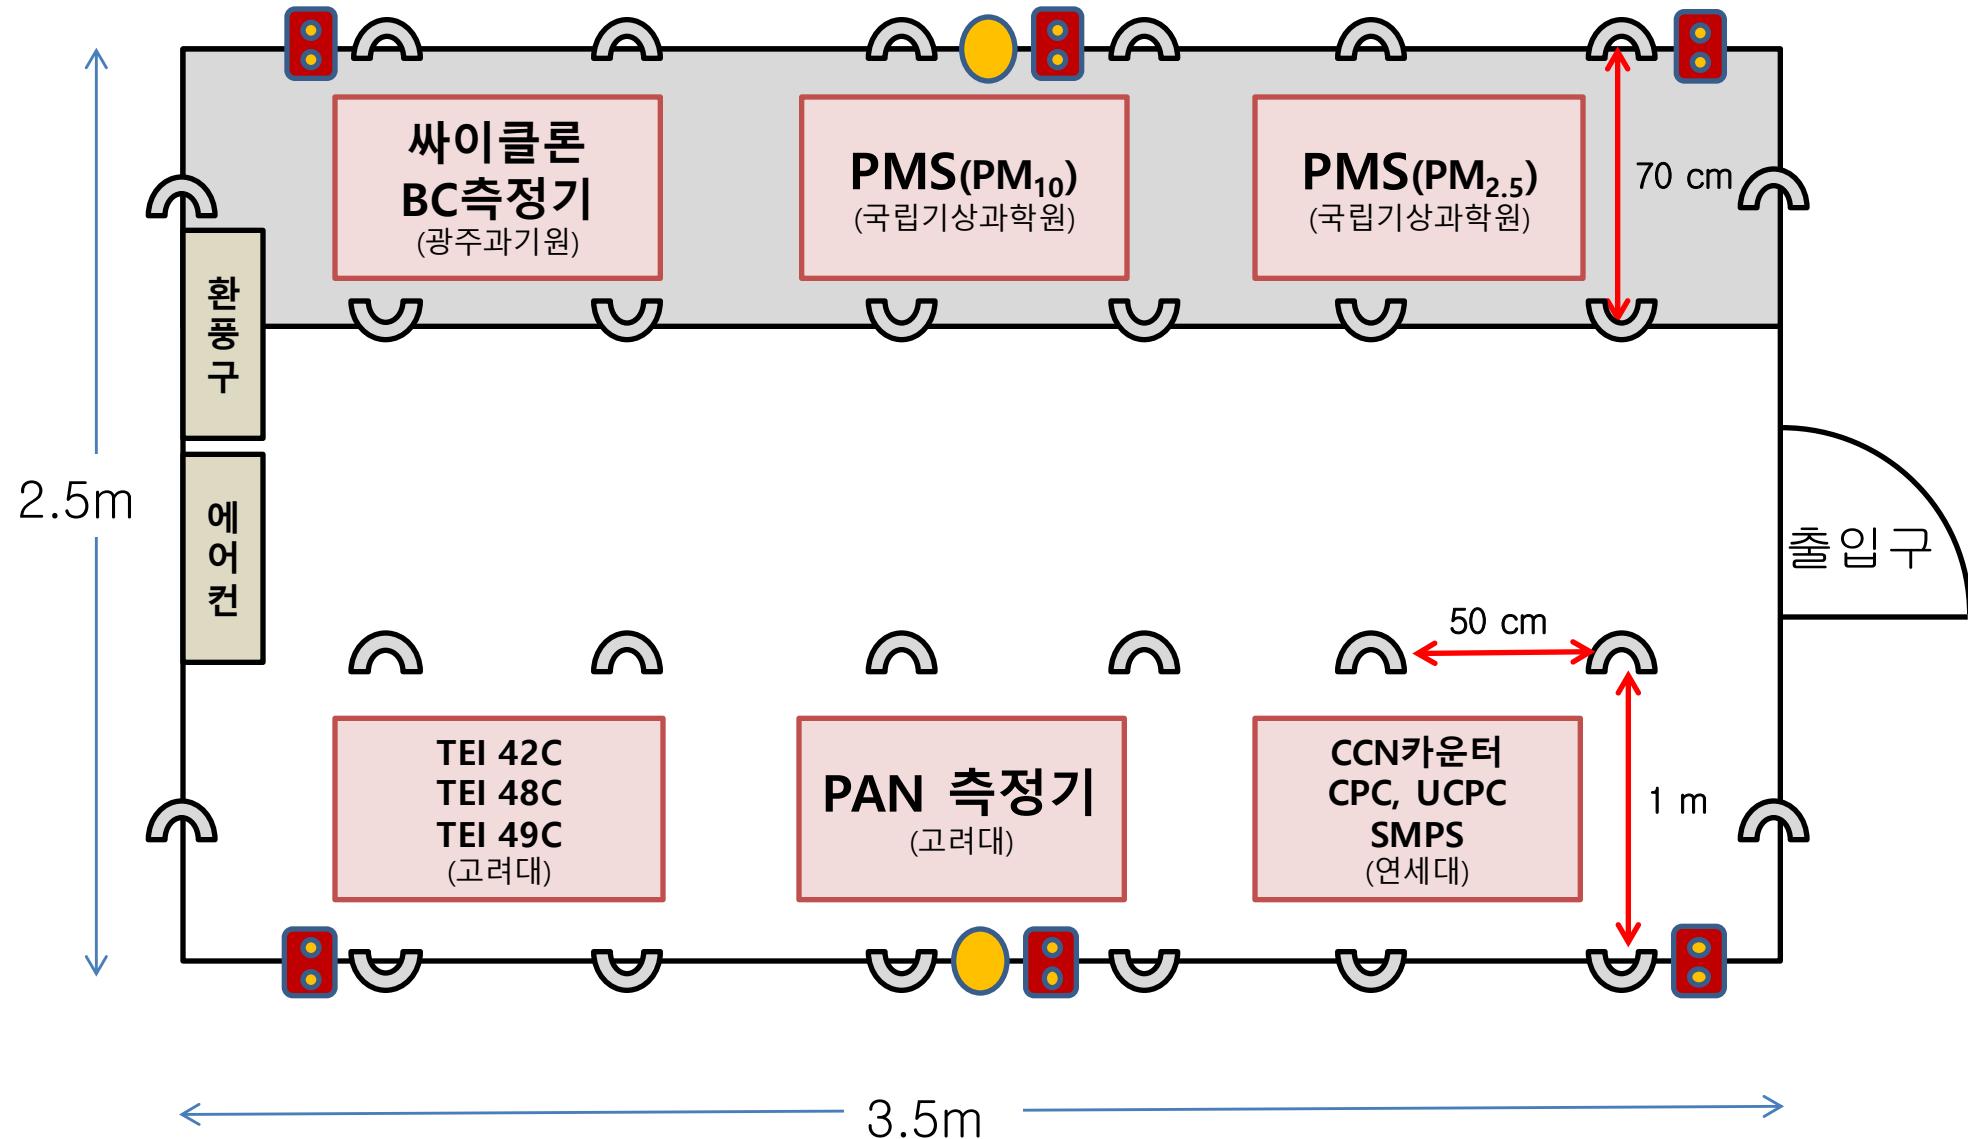

기상1호를 활용한 황사·연무 관측 예비실험

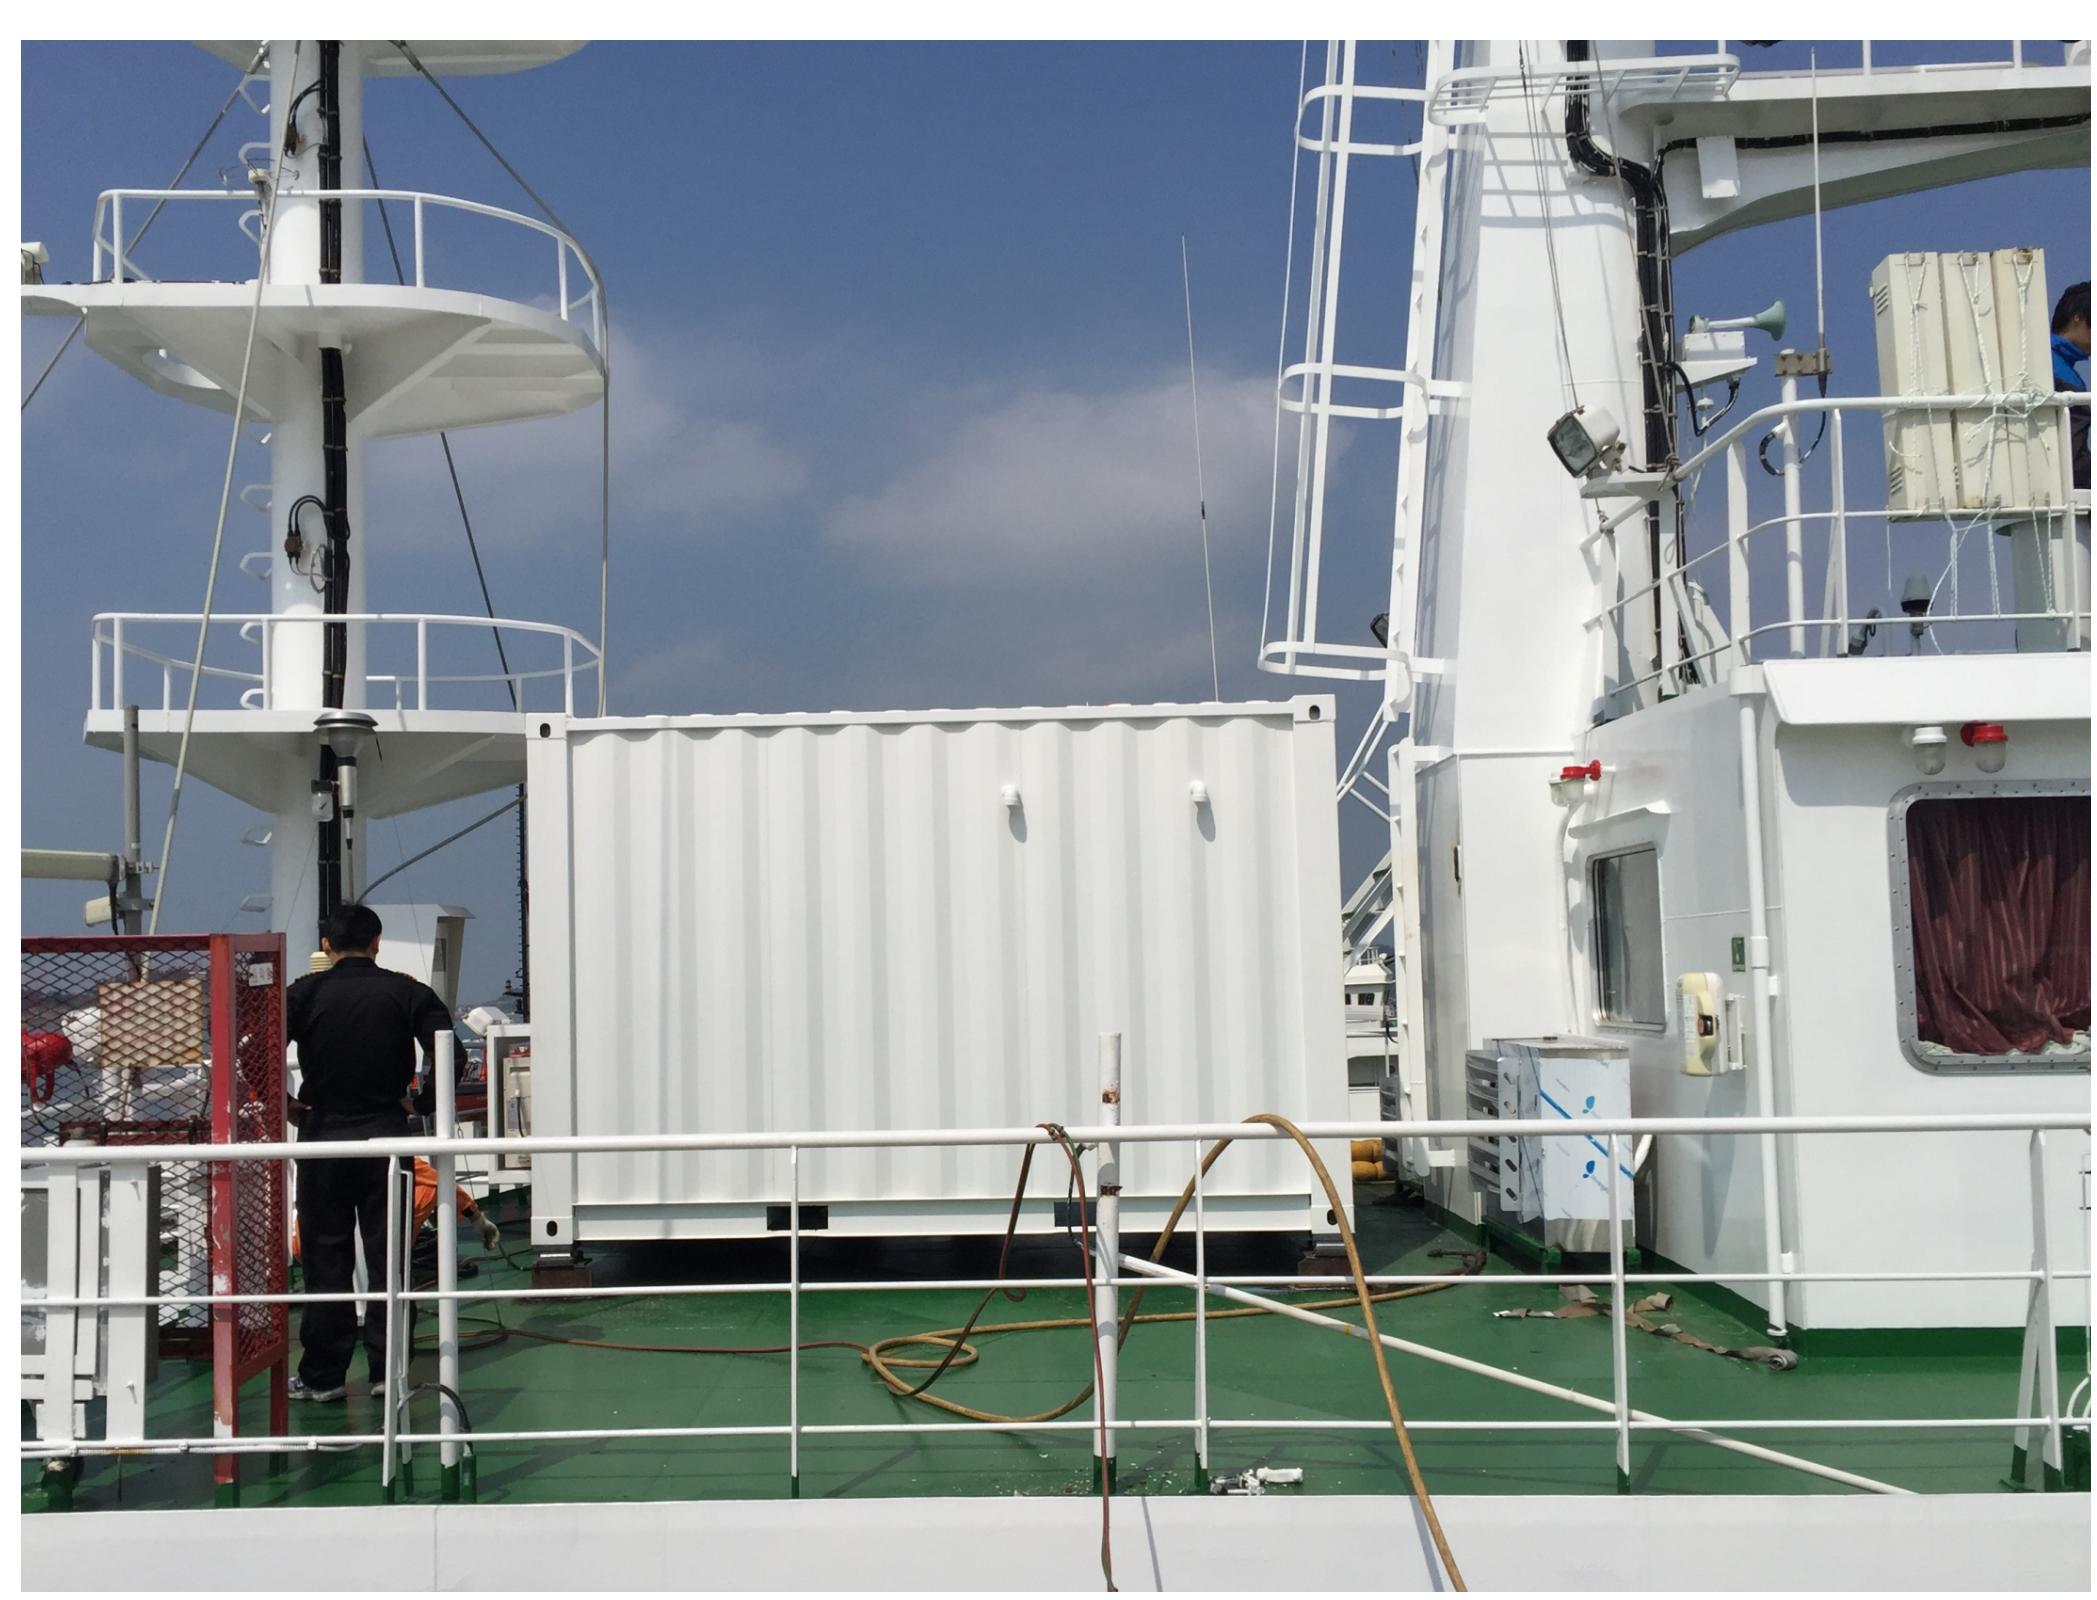

- 측정장비(연세대학교, 고려대학교)

CPC, CCNC

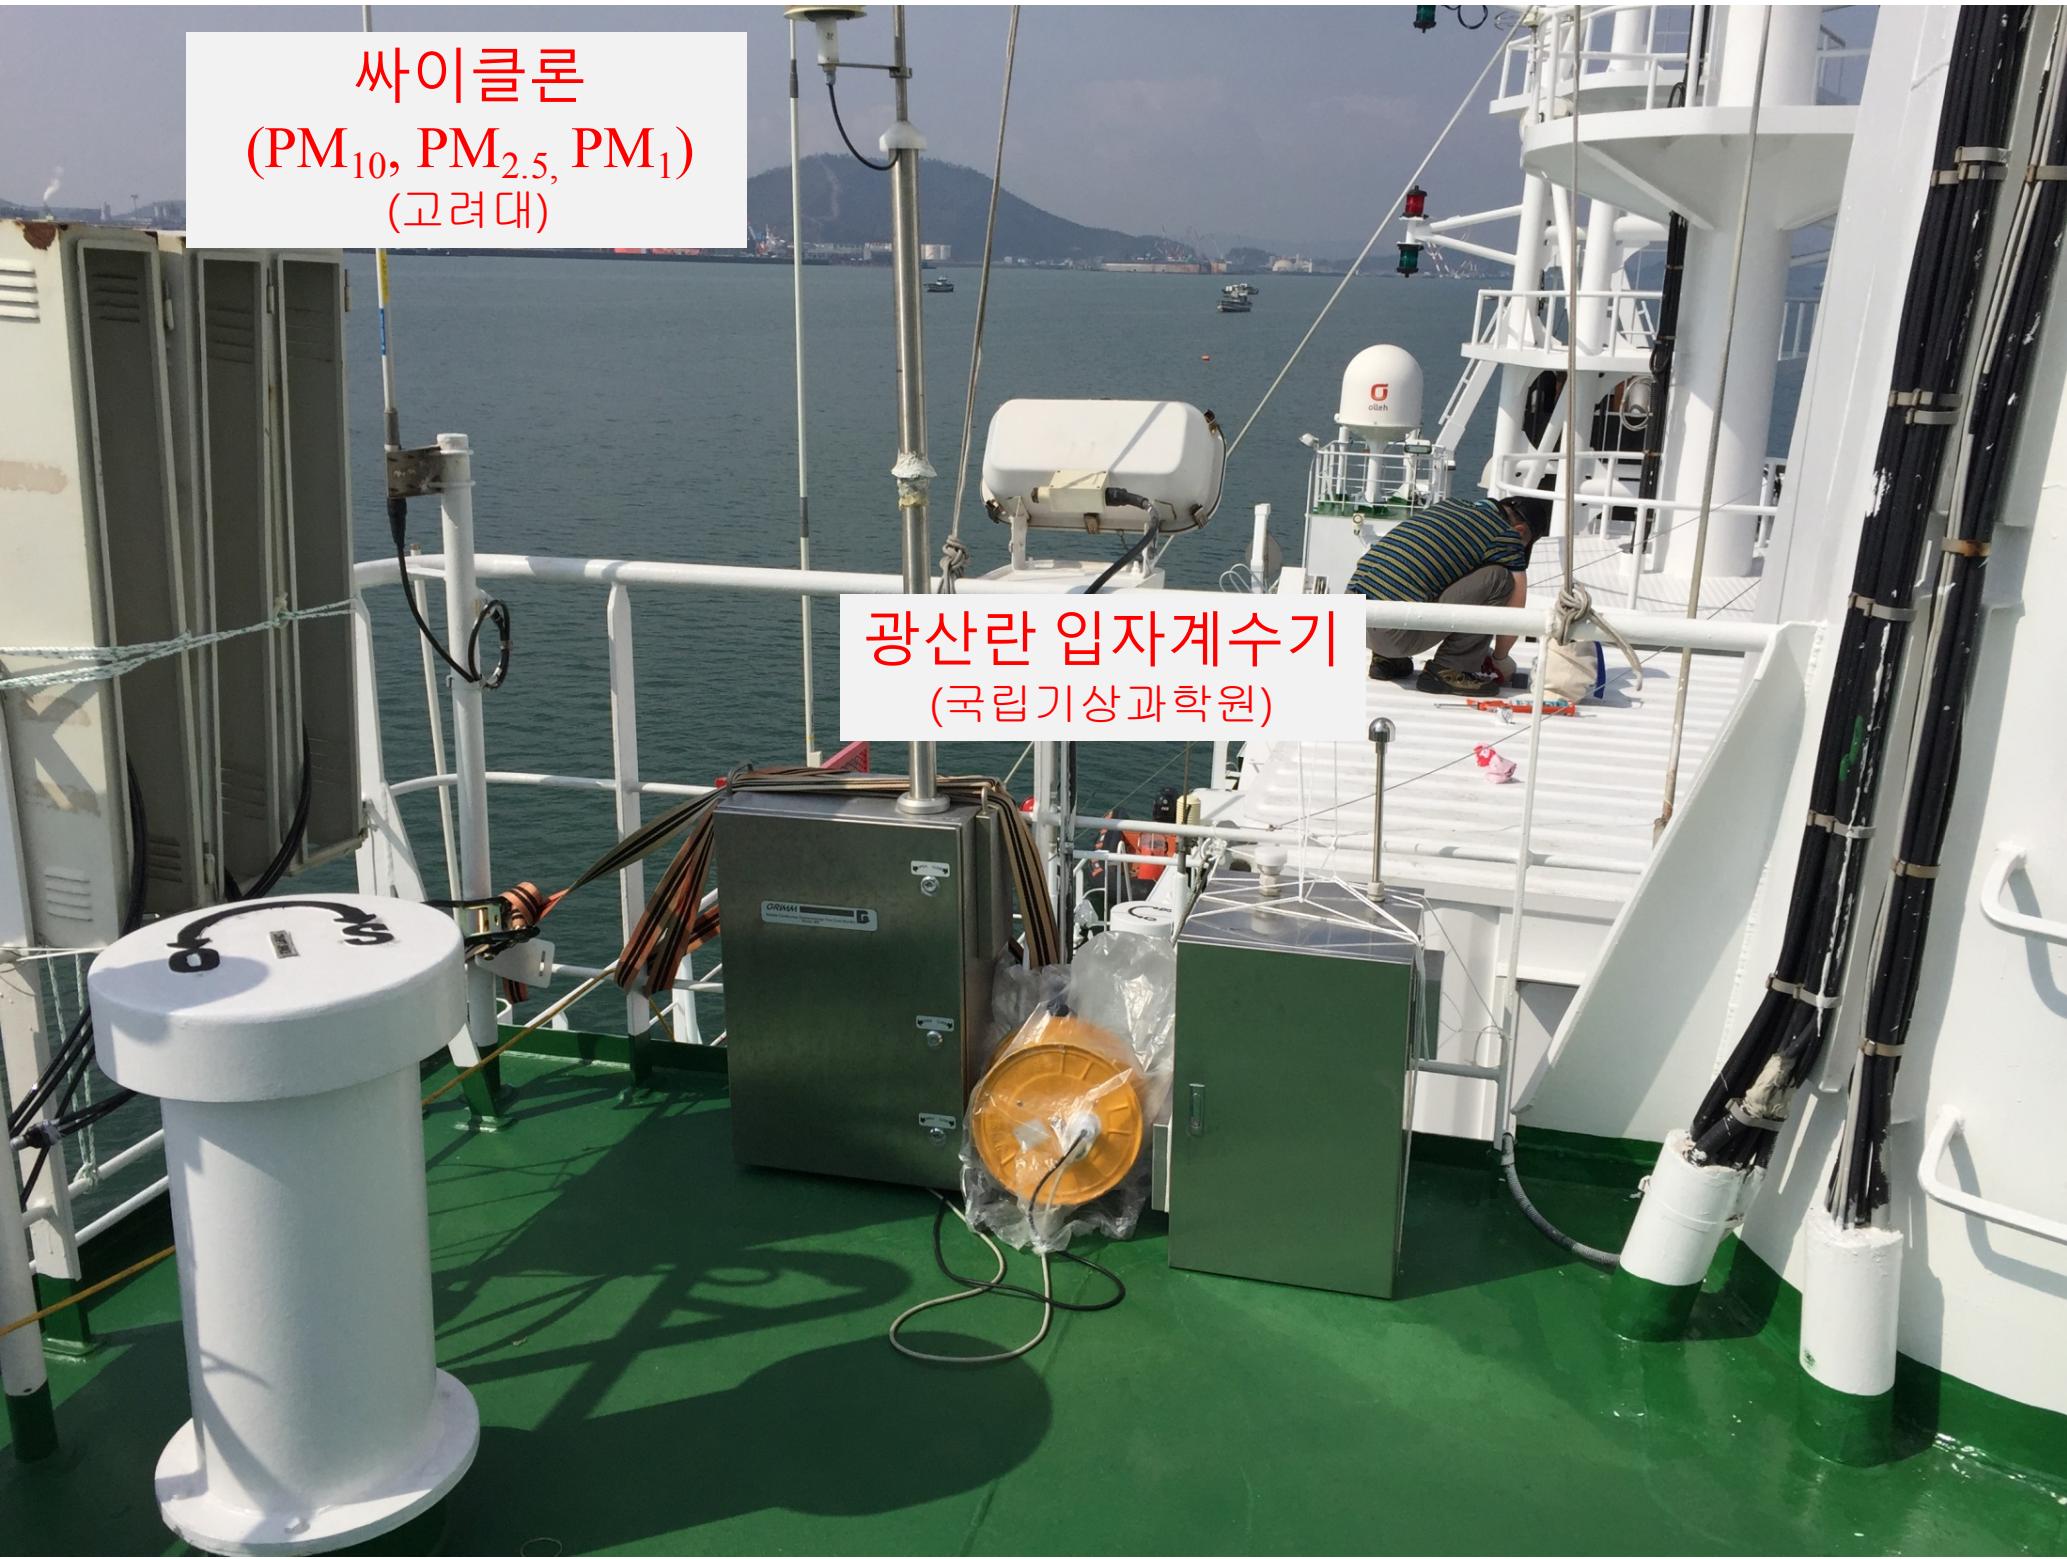

관측 컨테이너 설치(2015. 4. 8.)

싸이클론
(PM₁₀, PM_{2.5}, PM₁)
(고려대)

광산란 입자계수기
(국립기상과학원)

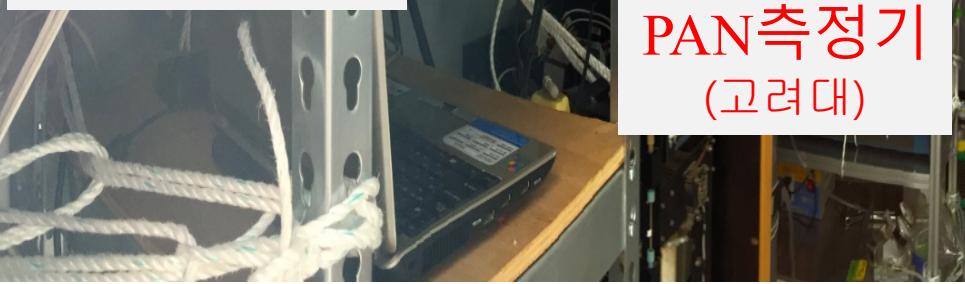

PMS (PM_{10} , $PM_{2.5}$)
(국립기상과학원)

오존측정기
CO측정기
NOx 측정기
(고려대)

CCNC, CPC,
UCPC, SMPS
(연세대)

PAN측정기
(고려대)

싸이클론
BC측정기
(광주과학기술원)

- 컨테이너 내부 여유 공간: PMS 대, rack 1개 추가 설치 가능/ 천장 천공 6개
- 외함 있는 장비는 갑판에 설치 가능

R/V Onnuri

	Specification
Operator	Korea Institute of Ocean Science and Technology (KIOST)
Gross Tonnage	1,370 ton
Accommodation	25 scientists/ 15 crews
Length	63.8 m
Breadth	12.0 m
Moulded Depth	7.55 m
Cruising speed	13 knots
Date of Launch	15 JULY 1991
Cruise day/year	270 days
Draft	6.5 m

Parameters to be measured

- AOP
- IOP
- Biogeochemical variables
- Atmosphere variables

	Measurement	Potential instruments used for data collection
Physical properties	Temperature and salinity	CTD sensor (Seabird)
Apparent Optical Properties	Water-leaving radiance; remote-sensing reflectance	HyperPro (Satlantic); ASD (ASD); C-OPS (Biospherical); HyperSAS (Satlantic)
	Diffuse attenuation	HyperPro, C-OPS
	Photosynthetic available radiation	HyperPro, PAR sensors, HyperSAS
Inherent Optical Properties	Total and dissolved beam attenuation and absorption Backscattering	ac-s spectrophotometer (WETLabs) Eco BB3, Eco VSF3 or BB9 (WetLabs) HydroScat-6 (HOBI Labs)
	CDOM absorption	ac-s – Filtered for CDOM Ultraphot (WPI)/Spectrophotometer WETStar fluorometers (WETLabs)
	Absorption of particulate and phytoplankton pigments	Spectrophotometer
Biogeochemical Properties	Concentration of phytoplankton pigments	HPLC
	TSM, particle size distribution	Gravitational; LISST
	Particulate (POC) and Dissolved Organic Carbon (DOC)	CEC 440HA Elemental Analyzer; MQ1001 carbon analyzer
	Nutrients (NO_3 , NO_2 , PO_4)	Spectrophotometer (Colorimetric analyses)
	pCO ₂ , Dissolved Inorganic Carbon, pH and Total Alkalinity	Sunburst SAMI-CO ₂ , Turner C-sense
	Phytoplankton Taxonomy	Imaging flowcytometer (McLane, Inc.); FlowCAM (Fluid Imaging)
Atmospheric Properties	Productivity	^{14}C or ^{13}C incubations; FRRF
	Aerosol optical depth	Sunphotometer
	NO_2 , O_3 , trace gases	Pandora

R/V Onnuri Devices

Conductivity Temperature Depth	Auto Weather Station	Air Sea Gravity Meter	Thermosalino Graph
			
Expendable Bathymeter	Sound Velocity Sensor	Sound Velocity Profiler	*Multichannel Seismic System
			
Acoustic Doppler Current Profiler	Hydrographic Echo Sounder	Echo Sounder	*Sub Bottom Profiling System
			
MBX Beacon Receiver	MRU Sensor	Trimble Beacon DGPS	Satellite DGPS Receiver
			

AQ & OC Coordination

- Determining KORUS-OC field campaign period
 - Flight schedule of KORUS-AQ is critical to KORUS-OC scheduling
 - Flight paths and time
 - R/V scheduling for 2016 starts in Nov. 2015
- Atmospheric variables for ocean color retrieval
 - It is crucial to accurately correct for atmospheric contributions from **aerosols**, **NO₂**, **O₃**, and **water vapor** for ocean color retrieval
 - GOCI produces science data for aerosol
 - AERONET-OC site available at Jeodo Station
- Information on sea surface reflectance

Remote sensing

- Pandora (O_3 , NO_2 , H_2O , SO_2 , HCHO), AERONET(AOD)
- LIDAR : Vertical profile of aerosol.
